Inuk Pricing Policy

Purpose of this Document

This document details Inuk's transparent and equitable approach regarding its pricing policy for access to the IGLU platform and carbon credit management.

1. Our Pricing Philosophy

Inuk has developed a radically different approach from other carbon market players, prioritizing simplicity and accessibility. Our model is based on the fundamental principle that access to ecological transition tools should not be a barrier to project development.

2. Platform Access

Access to our IGLU platform is entirely free for all project developers. This strategic decision reflects our commitment to democratizing access to the carbon market and encouraging the development of new innovative projects. Unlike common industry practices, we do not impose any annual usage fees or hidden costs.

3. Methodological Development

In specific cases where a project requires the development of a new avoided emissions methodology that doesn't yet exist, development fees may apply. These costs are discussed transparently with the project developer before any commitment and reflect only the work necessary to create the new methodology.

4. Pricing Structure

The overall price of the project is set by the project owner, with the possibility of annual review upon request. The breakdown of the price for each active project is detailed in the table below.

Project	Catalogue price	Last update	Measurability's Part (€)	Additionnality's Part (€)	Inuk's Part (€)
Alleyne&Co	21	10 Oct 2025 5:06 PM	8.4	8.4	4.2
Bousquet d'Orb	50	30 Sept 2025 2:54 PM	20	20	10
Broussan	50	30 Sept 2025 2:54 PM	20	20	10
Château	50	30 Sept 2025 2:54 PM	20	20	10
Emasol	31	30 Sept 2025 3:06 PM	12.4	12.4	6.2
Hay farms	31	30 Sept 2025 3:08 PM	12.4	12.4	6.2
Hoffmann Green	60	30 Sept 2025 2:54 PM	24	24	12
Issoudun	31	30 Sept 2025 3:06 PM	12.4	12.4	6.2
JBF	30	30 Sept 2025 2:54 PM	12	12	6
Lherm	50	30 Sept 2025 2:54 PM	20	20	10
Narbosol	31	30 Sept 2025 3:06 PM	12.4	12.4	6.2
Peebles & Co	21	30 Sept 2025 3:05 PM	8.4	8.4	4.2
Portsonachan&Co	17	30 Sept 2025 3:05 PM	6.8	6.8	3.4
Poultry	31	30 Sept 2025 3:08 PM	12.4	12.4	6.2
Rully	50	30 Sept 2025 2:54 PM	20	20	10
Verrerie Midi	50	30 Sept 2025 2:54 PM	20	20	10
Verrerie Plateau	50	30 Sept 2025 2:54 PM	20	20	10
Vestiaire Collective	34	30 Sept 2025 2:54 PM	15	15	4
Wielowies	11	30 Sept 2025 3:07 PM	4.4	4.4	2.2

5. Commission Structure

Our remuneration is **primarily** based on a fixed commission taken during the sale of carbon credits. This commission is:

- Established in consultation with each project developer
- Documented transparently in our contracts
- Adapted to the specificity of each project

The price of this commission is summarized in the previous table which details the cost structures for each active project.

6. Commitment to Transparency

We are committed to maintaining complete transparency regarding our pricing structure. Project developers know all potential costs in advance and can thus plan their projects with confidence. This approach ensures a lasting relationship of trust with our partners while ensuring the economic viability of projects.

This innovative pricing policy aligns with our vision of making the carbon market more accessible, transparent, and effective. It allows project developers to focus on what's essential: developing and implementing concrete solutions for ecological transition.
